- Providing the customer(s) with Sounds good Corporation identification prior to entering the home

POLICY

- Items that may be connected to TV include (3) components (VCR, DVD, DVR, Game Systems, Audio receiver and Speakers, Amplifier, CD player, Audio tape deck.
- Labor to perform these installations is not defined by a set timeframe but it is expected that the installation will include all necessary time to unpack, set-up, clean and educate the customer on all items involved with the new home theater system.
- Home Theater Installations as described and priced, includes a single room that:
Have adequate access to standard frame walls.

PROCEDURE

Installation Includes

1. Discuss customer's video/audio needs and expectations (Flat Panel, Home Theater, Outdoor Speakers, Universal Remote, etc)
2. Determine TV and components types and sizes fore each room or application
3. Determine bracket type for TV for required application.
4. Determine AC Outlet requirements for each room or application
5. Determine speaker type (in-wall, bracket or stand) for each room or application
6. Determine appropriate installation packages for each room or application
7. Determine/discuss any "out of scope" additional labor that may be required, due to construction type or custom requests.
8. Determine universal remote appropriate for application.
9. Measure and determine speaker wire run lengths. Discuss benefits of upgraded wire.
10. Determine proper type, length and quantity of component, cables for each room or application. Discuss benefit of upgraded cable quality.
11. Document all of the above findings on the site survey form, fax a copy to site survey box and return hard copy.

Possible Additional Charge

1. Does not cover multiple trips to customer's home. More than one trip to customer's home is at the customer's expense.
